

**It's true...** there is no place like home. When work and other demands keep you away from your home more than you'd like, it's comforting to enter your front door knowing your family has everything it needs to stay in touch...and in tune.

**smartHOME solutions** can equip your home with cutting-edge technology to meet the varied needs of your entire family. Whether you've just moved into a new home or have been at your place of residence for years, the **smartHOME solutions** team is dedicated to designing, retrofitting, installing and educating your family about a wide selection of superior home technologies. We also provide products including plasmas, DLPs, projectors, receivers and speakers from the industry's top manufacturers.

**Let's get started today! Don't forget to ask about creative financing solutions.**

"Technology... You Can Live With"

# HOME TECHNOLOGY OFFERED

## Home Theaters

Imagine having the movie theater feel at your fingertips. With a home theater, you can keep visiting family and friends entertained or have a quiet (or loud, depending on your taste) evening at home with your family. Popcorn not included!

## Whole House Audio Systems

Don't just put a lot of thought into how your new home will look and feel. Ensure you take time to think about how your home will sound! Whole house audio systems allow you to have music (a game, soap or movie) playing in various rooms and outside without having to buy a stereo or radio for each room.

## Intercom Systems

Today's modern home needs an intercom system that allows for more than just communicating from room to room. Superb

technology gives smaller intercom systems a sleek design with more functionality. Enjoy stereo sound throughout your home or plug in your iPod. Plus, the system's privacy feature will allow you to prevent anyone in the home from monitoring a particular room with just the push of a button.

## Closed Circuit Television (CCTV)

Feeling secure in your home is probably your number one concern. CCTV (Closed Circuit Television) is a visual surveillance technology designed for monitoring a variety of environments and activities.

## Central Vacuum Systems

Cleaning the house may not be your idea of a fun activity. The best thing about central vacuum systems is that they don't require you to carry a heavy unit from room to room or up and down the stairs. Central vacuum systems can cost less than a high-end moveable vacuum and can increase your home's resale value.

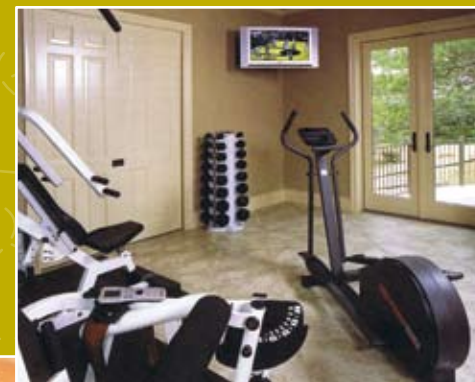

## Security Systems

A burglary and fire protection system is the easiest way for your family to feel safe and protect your valuable new investment. A monitored security system can save you money with homeowner's insurance and provide you with a peace of mind.

Is your home as 'sweet' as it can be? If not, give smartHOME solutions a call today to find out how we can upgrade your home with the best in technology advancements.
